

Anuradha Rajagopalan

CLOUD & DEVOPS ENGINEER

Chennai,India | +91 9342051693 | anuradharajarr@gmail.com

Objective

Cloud & DevOps Engineer with 2 year of experience building and automating AWS infrastructure for production systems, including custom CI/CD pipelines, containerized deployments, and AI-driven automation workflows (n8n, RAG). Currently pursuing MCA at University of Madras while working full-time.

Experience

Tecofize Pvt Lmt | DevOps Developer

June 2025 - Present

- Designed a multi-stack AWS CDK architecture (ImageBuilderStack, Ec2Stack, CodeDeployStack) using a custom AMI pre-baked with Docker, Nginx, Certbot, and the CodeDeploy agent — cutting manual server setup time and standardizing deployments across environments
- Built and deployed n8n automation workflows including a Gmail classifier (OpenRouter-powered) and a lead-generation pipeline (Outscraper → Firecrawl → AI scoring → Google Sheets), with ongoing integration work for Outreach.io via HTTP Request nodes
- Built a RAG proof-of-concept using Node.js, Docker-based PostgreSQL with pgvector, and AWS Bedrock (Titan Embed Text v2), resolving vector dimension mismatches (1024 vs 1536) and pgvector extension setup
- Built and maintained CI/CD pipelines using GitHub Actions, AWS CodePipeline, and CodeDeploy to automate application deployments.
- Developed and validated backend APIs using NestJS with DynamoDB integration, tested via Postman and Swagger
- Debugged AWS Cognito auth flows, IF-node routing, and AI response parsing for a production chatbot, including DynamoDB schema validation for session and lead-management tables
- Worked with AWS services including EC2, ECS Fargate, Lambda, Cognito, Aurora RDS, SQS, SES, EventBridge, IAM, and VPC for cloud-native application development.
- Implemented monitoring, structured logging, and error tracking using Sentry and integrated Slack notifications for deployment and operational alerts.
- Collaborated with cross-functional teams using Agile methodologies to deliver secure, scalable, and reliable cloud solutions.

CreamCollar EduTech Pvt. Ltd. | Cloud & AWS Infrastructure Intern

Oct 2024 - Jan 2025

- Gained hands-on experience with AWS services, including S3, CloudFront, Amplify, EC2, Lambda, CodePipeline, CodeBuild, Route 53, and IAM.
- Built single-stage and multi-stage Dockerfiles and deployed containerized applications using Docker.
- Created and managed EC2 instances, configured VPCs, Security Groups, and IAM policies for secure cloud environments.
- Assisted in deploying cloud applications and explored DevOps practices for infrastructure automation.
- Strengthened knowledge of AWS networking, cloud security, and deployment workflows through practical implementation.

Education

Vels Institute Of Science and Technology & Advanced Studies	2022-2025
BCA Cloud Technology Information Security CGPA: 9.25	
Modern Senior Secondary School	2021-2022
Grade-12 th Computer Science with Mathematics Final Result:81%	
Modern Senior Secondary School	2019-2020
Grade-10 th General Final Result:70%	

Skills & abilities

- **Cloud:** AWS (EC2, ECS, Lambda, S3, IAM, VPC, Cognito, Aurora RDS, SQS, SES, EventBridge, Bedrock)
 - **IaC & CI/CD:** AWS CDK, CloudFormation, GitHub Actions, CodePipeline, CodeDeploy, EC2 Image Builder, Docker
 - **AI & Automation:** n8n, RAG (pgvector, embeddings), MCP, AI orchestration workflows
 - **Programming:** JavaScript, Node.js, NestJS, Python, SQL, HTML, CSS
 - **Monitoring & Tools:** Postman, Swagger, Sentry
 - **Networking:** TCP/IP, VPC, Subnetting, Security Groups, Route 53 (SPF/DKIM/DMARC)
-

RAG-Based Knowledge Retrieval System (POC)

Built an end-to-end retrieval-augmented generation pipeline using Node.js, PostgreSQL (pgvector), and AWS Bedrock Titan embeddings. Solved real-world implementation challenges including vector dimension mismatches, chunking strategy selection, and cosine-similarity tuning for retrieval accuracy.

AI-Driven AWS Cloud Security Threat Detection

Designed and developed a web-based cloud security monitoring dashboard using HTML, CSS, PHP, MySQL, and Apache Server.

Integrated AWS GuardDuty, IAM, and Amazon SNS using the AWS SDK/CLI to fetch, analyze, and display security findings.

Implemented threat severity classification and automated notification workflows for proactive security monitoring.

Gained hands-on experience in AWS Cloud Security, IAM policy management, SDK integration, and secure web application development.
